

# Universal Coherence Model: Unifying G, h, and c via Source Order (C)

## 1. Mathematical Derivation of Equilibrium

The model defines mass (M) as an emergent effect of cosmic frequencies. At the stability threshold (C=1), the Planck Mass is derived as:

$$M_p = \sqrt{\hbar * c / G}$$

This confirms that the physical existence is a result of information processing.

## 2. Law of Witness (Information Conservation)

Protocol Alpha: [In - Out = 0]. All cosmic events are archived in the light frequency.

## 3. Strategic Conclusion

This unification opens the door for Cosmic Computing, surpassing current quantum limits. The Mother Equation is secured via AZTp encryption layers.
